

NumPy

Objective:

To perform numerical operations using the NumPy library.

Program

```
In [ ]: import numpy as np

numbers = np.array([10, 20, 30, 40, 50])

print("Array:", numbers)
print("Maximum Value:", np.max(numbers))
print("Minimum Value:", np.min(numbers))
print("Average:", np.mean(numbers))

matrix = np.array([
    [1, 2, 3],
    [4, 5, 6]
])

print("Matrix:")
print(matrix)
```

```
Array: [10 20 30 40 50]
Maximum Value: 50
Minimum Value: 10
Average: 30.0
Matrix:
[[1 2 3]
 [4 5 6]]
```

Result

The program was executed successfully in Google Colab. The experiment demonstrated array creation, numerical operations, and matrix manipulation using NumPy.

Student Information

Name: Marajul Islam

Roll: 28

Lab Report No.: 02
